

24-core optical cable tester

Overview

A Complete MPO 24* Fibre Polarity, Continuity and Connector Inspection Solution for short fibre links (up to 5Km) including MPO 24* singlemode or multimode cables as well as APC or UPC and male or female connectors. Fiber optic cable is a type of cabling that contains one or more optical fibers for transmitting data at high speeds and/or over long distances using light. These fibers are most commonly made of glass and are very thin, typically less than a tenth of the width of a human hair. Just connect the source, and view the far end with the microscope to. 24-Fiber OM4 MPO fiber loopback tester for fiber optic testing or network restorations. It is designed to effectively test the fiber transmitter capability and receiver. The MPO Optical Time Domain Reflectometer (OTDR) is an essential instrument for testing and verifying the integrity of multi-fiber connections such as those used in data centers and other network environments. This advanced device integrates critical testing functionalities including a light. The CertiFiber Max OLTS offers a native connection to MPO 12 pinned cables as standard and optionally supports MPO 12/16/24 and MMC 16/24 pinned or unpinned cables without complicated breakout cables or adjusting pin configurations.
