

72-core composite optical cable

Overview

This fiber optic cable features the good mechanical and temperature performance. 72 Cores GYTA Fiber Optic Cable is with high strength loose tube that is hydrolysis resistant and the optical cable filling materials ensure high reliability, makes the cable crush resistant. OPGW is a type of cable structure with composite of optical transmission and overhead ground wire for power transmission. Its working in power transmission line both as optical fiber cable and overhead ground wire which can provide protection of lightning strike and conducting short circuit. 72 Cores GYTA53 fiber optic cable Double Armored & Double PE Sheathed is the steel tape armored outdoor fiber optic cable and gel-filled PBT loose tubes, and wrapped around a phosphatized steel wire central strength member used for direct buried.
