

Wholesale fireproof cable trays in ASEAN are available from multiple suppliers, with prices depending on material, size, and fire-resistance specifications.

Overview of Suppliers and Products

Several suppliers in the ASEAN region and nearby markets offer fireproof cable trays suitable for industrial and commercial applications:

- Stainless Steel Fireproof Cable Trays:** These trays feature double insulation, internal and external flame-retardant materials, and fireproof coatings. They provide heat dissipation, self-extinguishing properties, and meet high standards for horizontal and vertical combustion performance. The inner groove often uses fiberglass and flame-retardant materials, while the outer surface is coated with fireproof paint.
- Galvanized Steel, Aluminum, and FRP Options:** Suppliers provide cable trays in hot-dipped galvanized steel, aluminum, epoxy-painted steel, and FRP fiberglass. Sizes range from 50 mm to 900 mm in width and 2.4–3.0 m in length, with options for light to heavy-duty applications.
- Customization and Accessories:** Many suppliers offer ladders, wireways, adjustable brackets, and quick-fitting lids. These options allow for tailored solutions for power stations, refineries, commercial buildings, and offshore platforms.

Wholesale Pricing Trends

While exact prices vary by supplier, material, and order volume, general trends include:

- Stainless steel fireproof trays** are typically higher in cost due to superior fire resistance and durability. Bulk orders can reduce per-unit costs.
- Galvanized steel or aluminum trays** are more cost-effective for standard industrial applications but may have lower fire-resistance ratings.

Verified suppliers in the Philippines and ASEAN offer competitive pricing for bulk orders, often including delivery and customization options.
