

Aasb distribution box

AI Overview

The AASB distribution box is an industrial I/O connection module designed for robust and flexible sensor and actuator connectivity in harsh environments.

OverviewThe AASB distribution box is a high-quality connection solution used in industrial automation to connect sensors and actuators efficiently. It typically features 4 ports with LED status indicators for easy monitoring of connectivity and operational status. The device uses M12, 5/4-pole, A-coded I/O connections, allowing a single I/O per port setup, which ensures reliable data and power transmission.

Construction and Environmental ProtectionThe housing of the AASB distribution box is made from TPU plastic in an orange and black color scheme, providing robust protection with an IP67 rating, making it suitable for harsh industrial environments. It operates in a wide temperature range from -15 °C to 80 °C, ensuring functionality under extreme conditions. The unit is designed for secure mounting and includes a fastening torque of 0.5 Nm for the I/O connections.

Electrical and Functional Specifications
Nominal actuator supply voltage: 24 V DC
Input wiring: Supports 2-, 3-, or 4-wire configurations for PNP sensors
Output wiring: Supports digital channels with up to 1.5 A current per connector and module
LED indicators: Provide visual status for each port, simplifying troubleshooting and monitoring

Compliance and SafetyThe AASB distribution box meets multiple safety and compliance standards, including UL (cULus Listed, UL 508), CE, and RoHS, ensuring both operational safety and environmental friendliness. It is designed to be used only when mounted and locked in combination with compatible connectors, such as Hirschmann or Lumberg Automation connectors, and should not be connected or disconnected under voltage.

ApplicationsThis distribution box is ideal for industrial automation systems, particularly where multiple sensors and actuators need to be connected reliably in challenging environments. Its compact design, robust construction, and flexible connectivity make it suitable for factory automatio...
