

All-aluminum fiber optic junction box

Overview

The junction box supports, organizes, and protects optical fibers while ensuring their minimum bending radius is not exceeded. It's rated IP65 and provides entry for all cables, including number tags for tube and fiber identification. The ADSS/OPGW Metal Junction Box, also known as a splicing box or Metal Joint Junction Box, is designed to house fiber core splices for outdoor intermediate optical cables. It connects trunk cables like OPGW to patch panels in control rooms. to ISO/IEC 11801, ISO/IEC 24702 and EN 50173 family ready for splicing of all common types of pigtails on all common types of cables. We offer both. The GZR Series 19" Rack-mounted Terminal Box (Rail-based) is a functional component for optical fibre distribution frames or network integrated cabinets, offering fibre splicing, distribution, and tray storage. The LAPP Group Splice Box Compact features a maximum capacity of 8. Available with 1,2,4 fibres Pre-connectorized cable Multiple lengths available Easy to through tube Protection against any risk of interference with the laser beam Security in connection cord retention The reliability of the grip of the socket on the wall DIN rail mounted application Support fiber.
