

Angola Data Center

AI Overview

Raxio Angola is the country's first carrier-neutral Tier III data center, significantly enhancing Angola's digital infrastructure with 3MW of IT power and space for over 800 racks. Overview of Raxio Angola Raxio Angola, located in Cacuaco near Luanda, is a state-of-the-art Tier III data center designed to support Angola's growing digital economy and improve both local and international connectivity. The facility spans 19,000 square meters and initially provides 3MW of IT power, with plans to expand to 7MW within five years. It can house over 800 server racks, more than doubling the existing data center capacity in Angola. Key Features Carrier-Neutral Environment: Customers can connect with multiple operators, cloud providers, and internet exchange points (IXPs), ensuring flexible, low-cost, and high-performance interconnection. Redundancy and Reliability: The facility is powered by two independent substations, backup generators, UPS systems, and batteries, providing 99.98% uptime and supporting robust disaster recovery and business continuity plans. Security and Compliance: Raxio Angola offers seven layers of physical security, full redundancy, and industry-standard compliance, ensuring a secure environment for IT infrastructure. Sustainability: The data center incorporates energy-efficient practices and an on-site water treatment plant that recycles water for cooling and non-potable uses. Strategic Importance Raxio Angola plays a pivotal role in strengthening Angola's digital backbone. By hosting the country's Internet Exchange Point (IXP), it keeps internet traffic local, improving speed, reliability, and affordability for users. The facility supports government initiatives to position Angola as a regional technology hub and fosters local skills development, high-value technical jobs, and digital independence. Market Context Angola's broadband connections reached 18 million in 2024, yet the country had only 8 to 10 live data centers, highlighting a significant infrastructure gap. The Raxio Angola project addresses thi...
