

Argentina-branded figure-eight optical cable 24 cores

Overview

GYXTC8S fiber optic cable is a figure 8 structure cable suitable for installation in the aerial environment for long haul communications. GYXTC8S features the centrally situated loose tube with good excess length and minimize the influence of lateral crush. The cross-section of GYXTC8S Cable's is in the shape of "8". The steel strand is suspended, and the double-sided plastic-coated corrugated steel belt forms excellent flattening resistance. The mental strength member is made up of stranded wires as the supporting part are completed with a polyethylene (PE) sheath to be figure 8. 24 Core GYTC8S Fiber Optic Cable Armor Stranded Loose Tube Steel Wire Strength Waterproof Figure 8 Self Supporting Outdoor GYTC8S is a typical self supporting outdoor fiber optic cable, suitable for aerial applications; The cable have nice moisture resistance performance and crush resistance. Aerial Self-supporting figure 8 fiber optic cable is a stranded multi loose tube fiber cable.
