

# Azerbaijan has a long history of selling optical fiber cables

## AI Overview

Azerbaijan exports optical fiber cables primarily to Ukraine and the UK, with recent years showing fluctuations in export volumes and prices. Export Overview In 2025, Azerbaijan's optical fiber cable exports declined notably in volume and value compared to the previous year, although the overall market has experienced significant growth over the past decade . Despite the recent drop, exports remain an important part of Azerbaijan's fiber optic industry, reflecting both domestic production capacity and international demand. Key Export Destinations Ukraine is the largest recipient of Azerbaijani optical fiber cables, accounting for a significant share of total exports . United Kingdom follows as another major market, though on a smaller scale compared to Ukraine . The export prices vary by destination, with the UK commanding higher average prices per ton than Ukraine, reflecting differences in market demand and purchasing power . Production and Market Trends Azerbaijan's optical fiber cable production has experienced mild shrinkage in recent years, with peak production occurring in earlier periods such as 2018 . The domestic market has seen record highs in consumption, indicating strong internal demand alongside exports . The market is influenced by global trends, including the growing demand for high-speed internet, 5G deployment, and broadband expansion, which drive both domestic consumption and export potential . Strategic Implications For businesses and investors, Azerbaijan's optical fiber cable market presents opportunities in export growth, particularly to neighboring countries and high-demand regions. The country's export potential is shaped by factors such as trade agreements, tariff structures, and regional infrastructure development . Overall, while Azerbaijan's exports of optical fiber cables have recently decreased, the country remains a notable player in the re...
