

Building power distribution boxes in Myanmar

AI Overview

Several specialized companies in Myanmar provide end-to-end solutions for power distribution box installation, including design, fabrication, installation, and commissioning. Key Service Providers

Yaung Ni Oo Electric Co., Ltd. offers comprehensive low- and medium-voltage distribution systems across Myanmar, covering urban and rural areas. Their services include site assessment, tailored distribution strategies, overhead and underground system design, high-quality component sourcing, network construction, rigorous testing, and final commissioning to ensure long-term reliability and safety.

IEM Myanmar provides a one-stop solution for power generation, distribution, and control systems. They handle site surveys, design, installation, commissioning, and ongoing maintenance, including annual maintenance contracts (AMC). Their engineering teams support both industrial and commercial projects, ensuring reliable operation of power distribution boxes and related systems.

Pacific Electric Co., Ltd. focuses on improving and modifying distribution systems, supplying high-quality imported components, and implementing electrical projects for government utilities and private industries. They also produce concrete electric poles and provide project execution support.

Thida Chan Myay Electrical Trading Co., Ltd. specializes in engineering design, material supply, construction, testing, and commissioning for substations and low-voltage distribution systems. They provide all types of main switchboards (MSB), emergency MSBs (EMSB), and distribution boards (DB) for commercial, residential, and industrial projects.

Panel Z Electric Co., Ltd. fabricates electrical switchboards, distribution boards, control panels, and HV switchgear panels. They offer turnkey solutions for installation, protection, and process cost-effective electrical systems, serving factory...
