

Cable tray manufacturer for Georgian power plants

AI Overview

Several international and regional manufacturers provide industrial-grade cable trays suitable for power plants in Georgia, including fiberglass, metal, and mesh systems. Recommended Manufacturers

1. Eurotray Eurotray, a Turkish company, specializes in steel cable trays and solutions for industrial applications. They offer a wide range of cable management systems suitable for power plants, with options for galvanized, painted, and pre-galvanized coatings, ensuring durability and corrosion resistance.
2. Ebo Systems Ebo Systems produces cable tray systems fabricated from glass-fibre reinforced polyester (GRP), ideal for environments requiring high chemical and corrosion resistance. Their trays are suitable for power plants, industrial facilities, and offshore installations.
3. EAE Electric EAE Electric manufactures modular cable trays using the roll forming method, providing flexible and scalable solutions for energy distribution in industrial plants. Their systems support both mains and UPS circuits and are compatible with Building Information Modeling (BIM) for project planning.
4. Ectray Ectray offers high-strength cable trays and ladders with customizable thicknesses (2mm–6mm) and coatings, suitable for industrial and power plant applications. Their systems are designed to protect cables from external factors and facilitate efficient installation.
5. Global B2B Marketplaces Platforms like Tradewheel.com and B2B directories list multiple manufacturers of galvanized, fiberglass, and stainless steel cable trays. These marketplaces allow Georgian power plant operators to source both standard and custom solutions from international suppliers.

Considerations for Power Plant Applications

Material Selection: Fiberglass (GRP) trays are preferred in corrosive or high-moisture environments, while galvanized or stainless steel trays are suitable for heavy-duty and high-load applications.
