

Cable tray specifications and prices

AI Overview

Cable trays and troughs are standardized systems designed to support, protect, and organize electrical and data cables, with dimensions and materials selected based on load, cable type, and installation environment.

Types and Materials

Cable Trays come in several types:

- Ladder trays:** Open design with side rails and rungs, ideal for heavy power cables and ventilation.
- Trough trays (V-Trough):** High-strength steel with ventilated or solid bottoms, suitable for control, instrumentation, and fiber cabling.
- Solid-bottom trays:** Provide maximum protection against dust and moisture.
- Channel trays:** Compact, for light-duty applications.

Materials commonly used include:

- Steel** (hot-dip galvanized, stainless, or powder-coated)
- Aluminum** (lightweight, corrosion-resistant)
- Fiberglass-reinforced plastic (FRP)** for chemical or outdoor environments

Standard Dimensions

Cable Tray Dimensions are standardized to ensure code compliance and proper cable fill:

- Width:** Nominal inside widths typically range from 50 mm to 600 mm for industrial and commercial applications.
- Depth/Height:** Side rail heights vary from 50 mm to 150 mm, controlling vertical stacking and heat dissipation.
- Length:** Standard straight sections are usually 2–3 meters; precast concrete troughs are often 1 meter, with 2-meter units available on request.

Material Thickness: Steel trays generally range from 1.5 mm to 3 mm, depending on load requirements. Trough trays often feature ventilated designs to reduce heat buildup and allow easy cable access, with covers available for security and protection. Precast concrete troughs comply with BS EN 1433 and BS EN 124 standards for load-bearing and lid strength.

Standards and Compliance

Cable trays and troughs are manufactured to meet international and regional standards:

- ANSI/NFPA 70** – National Electrical Code
- NEMA VE 1** – Metallic Cable Tray Systems
- ASTM A123, A653, A1011, A1008, B633** – Steel and coating specifications
- ISO 1461** – Hot-dip galvanized coatings

Pricing
