

Central Asia Fireproof Cable Tray Price Website

AI Overview

Fireproof cable trays are available in Central Asia from \$0.32 to \$12 per unit, depending on material, type, and customization options.

Overview of Fireproof Cable Trays

Fireproof cable trays are designed to support and organize electrical cables while providing fire resistance. They are commonly made from:

- Galvanized or powder-coated carbon steel for durability and corrosion resistance.
- Stainless steel (304/316) for superior thermal and mechanical performance in harsh environments.
- Aluminum alloys for lightweight, corrosion-resistant applications.
- Fiberglass-reinforced plastic (FRP) or advanced thermoplastics for high fire resistance and chemical resistance.

Price Range and Ordering

Wholesale prices start from \$0.32 to \$12 per unit, depending on material, size, and type (ladder, perforated, trough, or mesh). Minimum order quantities typically start at 10 units, but some suppliers may require larger orders for bulk shipping. Customization is available for length, perforation patterns, coating, and material type to meet project-specific requirements.

Suppliers and Logistics

Alibaba and Made-in-China list multiple manufacturers offering factory-direct pricing and customizable options. Major Chinese suppliers, such as TONGZHOU MACHINERY, can produce over 40,000 meters daily and ship globally via ports like Qingdao, facilitating delivery to Central Asia. Materials available include galvanized, hot-dipped zinc, stainless steel, aluminum, and FRP, allowing selection based on fire rating, environmental conditions, and load requirements.

Recommendations

When requesting a quote, specify material, tray type, dimensions, load capacity, and fire rating. Consider lifecycle costs, including installation, maintenance, and expected lifespan, as stainless steel or FRP may be more cost-effective long-term despite higher upfront costs. Ensure compliance with local fire safety codes and standards (...)
