

Characteristics and Specifications of Qatar Distribution Boxes

Overview

The box is made up of Polystyrene, a self-extinguishing plastic which provides corrosion-free, highly impact resistance, stable and maintenance-free use. All installation parts, such as cable entries, cable fixing rings, and new wire guide rings are moduled. These distribution boxes are designed for indoor use. Our solid rubber distributor housings are made from a mixture of natural rubber, styrene, and butadiene (NK/SBR). This triggers a vulcanization process which lends the distributor its final form.
