

Clamps for making cable tray bends

Overview

The fittings can be fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. These fittings can only be screwed on. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements. These tray systems allow excellent ventilation and prevent sagging while routing. Cut, bend, and connect the wire mesh trays. Straight. Sorry for the inconvenience, unfortunately there was a system error. Product Category Feedback: Did you find what you are looking for?
