

Custom-made secondary distribution boxes for construction sites in Malaysia

AI Overview

MEB Sdn Bhd offers fully customizable secondary distribution boxes in Malaysia, tailored to construction site requirements. Overview Custom-made secondary distribution boxes are essential for construction sites to safely distribute electrical power from incoming feeders to multiple outgoing circuits. These boxes can be designed to accommodate specific breaker quantities, internal components, and safety features, ensuring compliance with site requirements and electrical standards. Customization Options Size and Layout: Boxes can be fabricated to fit the number of breakers or electrical components required on-site. The design can be adjusted for space constraints and installation preferences. Internal Components: Options include busbars, conductors, phase indicators, wiring, tubing, and protective sleeving for safety. Material and Finish: Panels can be made from durable metals or industrial-grade materials suitable for harsh construction environments. Surface finishes and colors can be customized per client specifications. Additional Features: Rubber hole punches, cut-outs for equipment, and internal supports can be added to facilitate installation and maintenance. Manufacturing Process Design Stage: Initial design based on client specifications, including size, color, and internal layout. Approval Stage: Client reviews and approves the design before fabrication. Fabrication and Assembly: Manufacturing of the box, installation of internal components, and quality checks. Delivery: Finished distribution boxes are delivered to the construction site ready for installation. Local Suppliers in Malaysia MEB Sdn Bhd: Specializes in custom distribution panels with full design, fabrication, and assembly services. Weemax Packaging and YF Packaging: While primarily packaging suppliers, they offer custom industrial containers and boxes that could be adapted for non-standard electrical en...
