

Cutting method for 20-degree cable tray bends

Overview

Cut wires with B-Line Angular Bolt Cutter, bend to create a bend, tee, or reducer. The Offset Blade Cutter produces a clean cut. Oglaend System manufacture and deliver Multidiscipline modular bolted support systems, cable trays, cable ladders and accessories for complete installation and containment of Instrument, Electrical, Telecom, HVAC and Piping services. This cutting guideline provides you with the optimal cutting. Use this guide to learn the most effective installation practices when installing Cablofil tray. Each example of bends and tee's clearly illustrate proper tray cutting combined with recommended usage of Cablofil accessories. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. Calculate centerline arc lengths, structural setback bounds, linear chords, and offset tray travel.
