

Dominican Republic Electrical Distribution Box Price List

AI Overview

The estimated manufacturing cost for electrical distribution boxes in the Dominican Republic ranges from \$25 to \$60 per unit, depending on materials, labor, and production scale.

Cost Components

- 1. Labor Costs:** Labor in Dominican Republic free zones is 40–60% lower than U.S. levels, with assembly operations typically requiring 15–25 kWh of electricity per direct labor hour. Payroll burden, including social security, vacation, severance, transportation, and cafeteria subsidies, adds 35–45% above base wages.
- 2. Materials and Components:** Electrical distribution boxes require sheet metal, plastic, breakers, and wiring. Local suppliers exist, but some components may need to be imported. Free zone status allows 0% import duties on inputs, reducing material costs.
- 3. Overhead and Utilities:** Facility rent ranges from \$4.50–\$10.00 per sq ft/year, and industrial electricity costs are \$0.14–\$0.19 per kWh. Depreciation on capital equipment typically adds 10–15% of equipment cost annually.
- 4. Logistics and Export Costs:** If exporting to the U.S., ocean freight for a 40-foot container is \$2,800–\$4,500, with port handling and inland drayage adding another \$1,000–\$2,500. Products qualifying under CAFTA-DR enjoy 0% import duty, further reducing landed cost.

Industry Context

The Dominican Republic hosts 820 companies across 87 free zone industrial parks, including electrical equipment manufacturers. The free zone program offers 0% corporate tax for at least 15 years, duty-free U.S. access, and fast shipping to the East Coast (2–4 days), making it a competitive nearshore manufacturing location.

Practical Estimate

For a small-to-medium production run of electrical distribution boxes:

- Low-end estimate: \$25–\$30 per unit (basic materials, local labor, small batch)
- Mid-range estimate: \$35–\$45 per unit (higher-quality materials, moderate automation)
- High-end estimate: \$50–\$60 per unit (premium materials, full automation)
