

Emergency communication 2-core figure-eight optical cable

Overview

GYXTC8S figure-8 self-supporting outdoor fiber optic cable with integrated messenger strand for aerial OSP deployment. Tubes (and fillers) are stranded around the central strength member (Steel or FRP) to form the cable core. The cable core is filled with water blocking compound and armored with corrugated steel tape (CST).

Characterized by its unique “Figure 8” profile, this cable incorporates a steel stranded wire as its self-supporting component, offering unparalleled tensile strength during both. Corning ALTOS® figure-8 gel-free cables are self-supporting aerial cables designed for easy and economical one-step installation. The gel-free design is. ZCC-2. 8 Optic Cable is Dual-core figure-8 optical cable. 2, ICEA-596, GR-409, or IEC 60794-2-10/11. They are used for campus-type environments, aerial links self-support or ducted underground service for long runs between buildings.

 Advantages of Figure 8 Fiber Optic Cable
 Why Choose Figure 8 Fiber Optic Cable For Your Network?
 This compact figure 8 fiber optic cable is not only lightweight and flexible but also streamlines the installation process. The integrated steel wire messenger design significantly reduces installation costs and time, negating the need for additional support structures. Ideal for FTTH (Fiber to the Home) networks, this cable simplifies the roll-out...
