

Fiber Optic Cable Steel Wire Hook

Overview

The universal bracket is made from galvanized steel by cold stamping production method. Also called FTTH hook (pole bracket for FTTH) can be attached on wooden, metal, concrete poles or buildings by stainless steel strap or bolts. Anchor and suspension brackets and hooks materials: The brackets, hooks and other accessories are all passed lab test, so they can service in bad. Optical Distribution Network (ODN) is composed of OLT and user equipment interconnected by optical fibers, splitters, and connectors, with downstream signal streams coming to the user interfaces and upstream signal streams for OLT processing purposes. This device consists of splitting a single. Stainless steel FTTH hook YK-05 either called drop cable hook is designed to tension drop wire clamps with suitable fiber optical cable in outdoor overhead FTTH network line deployment. FTTH drop cable S-type fitting is easy in installation, and requires preparation of optical cable before attaching.
