

Fiber Optic Heat Shrink Sleeve Machine Manufacturer

AI Overview

Leading manufacturers of fiber optic heat shrink sleeving machines include TE Connectivity, GAOtek, and LongXing, offering equipment for precise and durable fiber splice protection. Key Manufacturers and Products

TE Connectivity provides a range of heat shrink machines designed for sealing and protecting electrical and fiber optic splices. Their equipment ensures optimal heating, mechanical protection, and insulation for harsh environments, supporting both single-wall and dual-wall tubing applications. TE's machines are widely used in industrial and telecommunications settings for reliable splice protection.

GAOtek specializes in fiber optic fusion splicers with integrated heating capabilities. Their machines feature fast splicing and heating cycles, automatic core alignment, and high-precision control for single fiber and ribbon fiber applications. GAOtek's equipment is suitable for field installations and large-scale network projects, offering durability and consistent splice quality.

LongXing (LX Telecom) manufactures optical fiber heat shrink tubes and associated sleeving machines. Their products include cross-linked polyolefin tubing with reinforced rods (quartz or ceramic) to provide mechanical strength and maintain optical transmission performance. LongXing offers both single fiber and ribbon fiber solutions, with customization options for specific project requirements.

Additional Considerations

When selecting a fiber optic heat shrink sleeving machine, consider:

- Heating time and temperature control: Machines with precise temperature regulation reduce the risk of fiber damage.
- Compatibility with fiber types: Ensure the equipment supports single-mode, multi-mode, or ribbon fibers as needed.
- Automation and alignment features: Automatic core alignment and integrated cleavers improve efficiency and splice quality.
- Durability and field usability: Portable and shock-resistant machines are ideal for field work.
