

Fiber optic cable inventory remaining

AI Overview

Fiber optic cable inventory is currently constrained due to high demand and supply chain bottlenecks, but some surplus stock is available from vendors like AFL. Current Supply Situation The fiber optic industry is experiencing a significant shortage driven by multiple factors: rapid expansion of broadband networks, 5G rollouts, and the construction of data centers for AI and cloud services . U.S. manufacturers face limited production capacity, particularly for Buy America-compliant glass, with only a few suppliers like Corning, OFS, and Prysmian able to meet demand . Lead times for new fiber orders have increased dramatically, sometimes exceeding a year, compared to the typical 8-12 weeks . This shortage has tightened inventories, increased prices, and delayed deployment schedules . Available Surplus Inventory Despite the overall shortage, some finished fiber optic cable inventory is available from vendors. For example, AFL lists surplus stock for specific part numbers, including DNA-33876-01, DNA-33832-01, DNA-32733-01, DNA-32938-01, and DNA-33575-01. These are available in minimum order quantities of 1,000 feet, with cut charges applying, and availability is subject to prior sale . AFL also has surplus Optical Ground Wire (OPGW) in stock . Interested buyers are advised to contact AFL or their preferred distributor to confirm current availability and pricing. Recommendations Check multiple suppliers: Given the tight supply, sourcing from multiple vendors can improve chances of securing cable. Plan for lead times: Expect longer delivery times due to global demand and production constraints. Consider surplus stock: Vendors like AFL provide immediate availability for certain part numbers, which can help meet urgent project needs. Monitor supply chain updates: Manufacturers are expanding production, such as Emtelle producing an additional 5.5 million fiber kilometers, which may improve availability in the near future . In summary, while fiber optic cable inventory is limited, surplus stock from...
