

Finished support for cable trays

Overview

Support Methods: Common support methods include trapeze hangers, which are used for ceiling suspensions, and cantilever wall brackets, which are mounted directly to walls for runs along vertical surfaces. The choice depends on the building structure and the planned tray route. maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Cable Support Systems are well designed to provide necessary support for cable trays, cable ladders and trunkings. UNITECH's metal framing channel is cold formed on modern rolling machines from low carbon. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng- ience and safety. Our cable support. Recommended for electrical installations, telecommunications, pipelines and supports for cable trays. The INDEX range of profiles and supports consists of a wide variety of products and accessories for the simple, fast and durable modular assembly of rails or tracks. Why Are Cable Tray Supports Important?
