

Flange Fiber Optic Coupler Price

AI Overview

Fiber optic flange couplers typically range from \$1–\$10 per unit for standard adapters, with bulk packs or specialized high-performance couplers costing more.

Typical Pricing

Standard single couplers: Basic SC, LC, or ST flange couplers for singlemode or multimode fibers generally cost \$1 to \$5 per unit when purchased individually or in small quantities (Amazon listings show packs of 48 couplers priced around \$50–\$60, averaging about \$1–\$2 per coupler).

High-performance or specialized couplers: Planar Lightwave Circuit (PLC), Fused Biconic Taper (FBT), or high-power couplers designed for low insertion loss and precise signal distribution can cost \$5–\$10 or more per unit, depending on specifications and manufacturer.

Bulk purchases: Buying in larger quantities often reduces the per-unit cost, especially for standard adapters used in patch panels or network installations.

Factors Affecting Cost

Connector Type: LC, SC, ST, or MTP connectors have different manufacturing costs; LC and SC are most common and generally less expensive.

Fiber Type: Singlemode couplers are usually slightly more expensive than multimode due to tighter tolerances.

Performance Requirements: Low insertion loss, high repeatability, and durability increase cost.

Mounting Style: Panel-mount or flange-mount designs may cost more than simple inline adapters.

Customization: Custom or specialized couplers for specific wavelengths or dual-window applications can significantly increase price.

Summary

For most standard applications, expect to pay \$1–\$5 per fiber optic flange coupler, while high-performance or specialized couplers may range from \$5–\$10 or higher. Bulk orders and online marketplaces like Amazon or FS.com can offer competitive pricing, whereas custom or industrial-grade couplers from specialized suppliers may cost more depending on technical requirements.
