

Hot melt adhesive junction box price

AI Overview

The price of a hot melt adhesive junction box varies widely depending on capacity, brand, and system type, typically ranging from a few hundred to several thousand dollars.

Pricing Overview

Hot melt adhesive junction boxes are part of larger hot melt adhesive systems, which include melters, pumps, and dispensing units. Prices depend on factors such as:

- Volume capacity (small 10L units vs. large 5000L systems)
- Type of adhesive (standard hot melt vs. reactive polyurethane)
- Automation and control features (manual vs. touch-screen or automated systems)
- Brand and supplier (Nordson, ITW Dynatec, JCT, etc.)

For example, JCT turnkey hot melt adhesive lines for industrial applications are sold on platforms like Alibaba, with pricing negotiable depending on system size and shipping terms. Nordson and ITW Dynatec offer a range of melters and supply units suitable for low to high-volume operations, but prices are typically provided upon request due to customization options. Star Packaging Supplies and Hotmelt.com provide bulk hot melt equipment and glue systems, often with guidance from sales experts to determine the best solution for your application.

Typical Price Range

- Small junction boxes or low-volume melters: \$300–\$1,000
- Medium-volume systems with pumps and hoses: \$1,000–\$5,000
- Large industrial turnkey systems: \$5,000–\$20,000+ depending on capacity and automation features

Recommendations

Contact suppliers directly for a quote, as prices vary with system configuration and shipping. Specify your adhesive type and volume requirements to get accurate pricing. Consider warranty and spare parts availability, as some suppliers provide free replacement parts for critical components within the first year. By comparing multiple suppliers and specifying your operational needs, you can find a hot melt adhesive junction box that fits both your budget and production requirements.
