

How much does Venezuelan horizontal cable tray cost

AI Overview

Venezuelan horizontal cable trays typically cost between \$20 and \$60 per standard section, depending on material, type, and supplier.

Price Overview Horizontal cable trays in Venezuela are available in various materials such as hot-dip galvanized steel, aluminum, and stainless steel, with ladder-type and channel-type designs being common. The standard length for a straight section is usually 2.4 meters, and prices vary based on material and protective coatings. For example, hot-dip galvanized ladder trays are generally more affordable than aluminum or stainless steel options. Wire mesh or basket trays, often used for data cables, are lighter and cheaper, suitable for offices or data centers.

Cost Components The total cost of a horizontal cable tray system includes:

- Tray sections:** The main horizontal pieces, typically \$20–\$60 per 2.4-meter section depending on material.
- Fittings and bends:** Horizontal bends, tees, and cross pieces are sold per unit and can add 20–30% to the total cost.
- Supports and brackets:** Wall mounts, ceiling hangers, and other supports are necessary for installation and can significantly affect the budget.

Local Suppliers in Venezuela Several suppliers and manufacturers provide cable trays in Venezuela:

- Montuenga Hnos (Cabletray®):** Offers a full range of modern cable tray systems, including horizontal bends and tees, with engineering support for custom designs.
- Jeetmull Jaichandlall:** Listed among top suppliers and exporters, providing competitive pricing and global service.
- Brilltech Engineers:** Another local supplier offering cable trays and related components.

Practical Considerations Material choice affects both cost and durability: galvanized steel is cost-effective, aluminum is lightweight but more expensive, and stainless steel is premium for corrosive environments. Project complexity: More bends, tees, and supports increase the total cost.
