

How much does a 200A distribution box cost

AI Overview

A 200A distribution box typically costs between \$250 and \$1,500, with total installation costs ranging from \$1,300 to \$3,000 depending on complexity.

Component Cost The price of a 200A panel alone varies based on brand, features, and enclosure type. A basic, high-quality panel from a major manufacturer usually costs \$250 to \$350, while more advanced units with additional features, such as built-in surge protection or smart monitoring, can exceed \$1,500. Enclosure type also affects cost: indoor-rated NEMA 1 panels are cheaper, whereas outdoor-rated NEMA 3R panels are more expensive due to enhanced weather protection. Wholesale options for industrial 200A distribution boards can be as low as \$1.65 per unit when purchased in bulk.

Installation and Upgrade Costs If you are upgrading an existing electrical panel to 200A, the total cost includes labor, wiring, and any additional components. On average, homeowners spend \$1,300 to \$3,000 for a standard 200A panel upgrade. In high-cost metropolitan areas or for complex installations, costs can rise to \$4,500 or more. Factors influencing the total cost include panel relocation, rewiring, labor rates, and the number of circuits required.

Summary

Category	Cost Range
Basic 200A panel	\$250–\$350
Feature-rich or smart panel	\$1,000–\$1,500+
Wholesale industrial units	~\$1.65 per unit
Total installed cost for residential upgrade	\$1,300–\$3,000 (up to \$4,500+ in complex cases)

Choosing the right panel depends on your installation environment, desired features, and whether you are performing a simple replacement or a full upgrade. Always hire a licensed electrician for installation to ensure safety and compliance with local electrical codes.
