

How much does a Huijue 10G optical module cost

AI Overview

The Huijue 10G Single-Core Optical Module typically ranges from \$50 to \$120 per unit, depending on distance, vendor, and certification. Price Overview The Huijue 10G single-core (single-fiber) optical module, often referred to as a 10G BIDI SFP+ module, is designed for 10G Ethernet links over single-mode fiber. Prices vary based on transmission distance (commonly 20km, 40km, or 60km), vendor, and certification status. Modules with verified compatibility for Huawei, Cisco, and H3C switches generally cost more due to reliability and testing standards. Typical market prices are in the \$50–\$120 range per module, with longer-distance or certified modules at the higher end. Key Specifications Affecting Price Transmission Distance: 20km, 40km, 60km options; longer distances increase cost. Wavelengths: Uses 1310nm for uplink and 1550nm for downlink in single-fiber BIDI design. Compatibility: Certified modules for Huawei, Cisco, and H3C are more expensive but ensure stable operation. Power Consumption: Low power usage (~1.2W) contributes to efficiency but does not significantly affect price. Performance: Supports 10Gbps bidirectional transmission with low latency (
