

How to connect the external power line to the switch in the distribution box

AI Overview

To connect an external power line to a distribution box, connect the incoming live (phase) and neutral wires to the main MCB, then distribute power through RCCBs and individual MCBs, ensuring proper earthing and safety checks.

Step-by-Step Connection Process

- 1. Safety First** Before starting, ensure the main power supply is turned off to prevent electrical shock. Use insulated tools and wear protective gear during installation.
- 2. Mount the Distribution Box** Secure the distribution box to a wall at an accessible height, typically around 1.5 meters, in a dry and ventilated area.
- 3. Identify Input and Output Terminals** The input terminals are for the external power line (phase and neutral). The output terminals connect to the internal circuits via MCBs and RCCBs.
- 4. Connect the External Power Line** Connect the live (phase) wire from the external supply to the input of the main double-pole MCB. Connect the neutral wire to the same main MCB input. If using an RCCB, connect the output of the main MCB to the input of the RCCB.
- 5. Connect Circuit Breakers** For single-pole MCBs, connect the phase wire from the RCCB output to each MCB input. Connect the neutral wire from the RCCB output to the neutral bus bar. For double-pole MCBs, connect both phase and neutral wires from the RCCB output to the MCB input.
- 6. Earthing** Connect the earth wire from the external supply or earth pit to the earth bus bar in the distribution box. Ensure all metallic parts of the box and connected loads are properly earthed.
- 7. Connect Load Circuits** For single-pole MCBs, connect the load's phase wire to the MCB output, and neutral and earth wires to the respective bus bars. For double-pole MCBs, connect both phase and neutral wires of the load to the MCB output, and earth to the earth bus bar.
- 8. Verification** Use a multimeter to check for correct voltage, continuity, and absence of short circuits before switching on the main supply.
