

Huawei 5720 Optical Switch

Overview

The Huawei S5720 series offers a comprehensive, modular approach to campus and branch switching—from energy-efficient gigabit access to high-performance PoE+ cores. Table 4-178 lists the mapping between the S5720-12TP-LI-AC chassis and software versions. If a port uses a GPON optical module, other 1000BASE-X optical ports cannot be used. It is used with a console cable. Solution: To solve this problem, you can follow these steps: Check if the fiber and optical modules are compatible. Single-mode/multimode fibers and. Why Does the S5700 Fail to Restrict User Access Through a Traffic Policy (V200) What is TACACS and How to Configure TACACS?

What is BPDU Protection and How to Configure BPDU Protection?

What Is a Trunk Link What Is a Microburst and How to Detect a Microburst (V600) What Is Mirroring What If I. The S5720-SI series switches are standard Layer 3 Gigabit Ethernet switches that provide flexible full gigabit access and cost-effective fixed GE ports and 10GE uplink ports. The S5720-SI was developed based on next-generation high-performing hardware and the Huawei Versatile Routing Platform. Huawei S5720 series Ethernet switches (S5720 for short) are next-generation energy-saving Gigabit Ethernet switches that function as the access devices to deliver high bandwidth or aggregation device for Ethernet multi-service networks.
