

Huijue Switch Non-PoE

AI Overview

The Huijue (Ruijie) RG-ES108GD is an 8-port 10/100/1000Mbps unmanaged Non-PoE switch designed for reliable, cost-effective networking without Power over Ethernet.

Key Features

- Ports and Speed:** 8 RJ45 ports supporting 10/100/1000Mbps Gigabit Ethernet, suitable for high-speed data transmission in small to medium networks.
- Non-PoE Design:** Does not provide Power over Ethernet, so connected devices require separate power sources.
- Unmanaged Switch:** Simple plug-and-play operation with no configuration required, ideal for offices or enterprise networks where advanced management is not needed.
- Cloud Visibility:** Although unmanaged, the switch can be monitored via Ruijie Cloud if at least one managed switch exists on the network.
- Hardware Flow Control:** Large buffer ensures smooth data transmission and reduces packet loss during high traffic.
- High Reliability:** Designed for stable network performance and long-term operation.

Applications

- Small Office Networks:** Connect multiple computers, printers, and other network devices without PoE requirements.
- CCTV Installations:** Suitable for small-scale surveillance setups where cameras have independent power sources.
- Enterprise Expansion:** Can be used to extend existing networks without adding PoE complexity.

Advantages of Non-PoE Switches

- Cost-Effective:** Lower price compared to PoE switches since no power delivery circuitry is included.
- Flexibility:** Devices can be powered independently, allowing use with equipment that does not support PoE.
- Simplicity:** Easy to deploy and maintain, especially in networks that do not require centralized power management.

The RG-ES108GD is a practical choice for users seeking a reliable, unmanaged, Gigabit Non-PoE switch for small to medium network environments, offering both performance and simplicity without the additional cost of PoE functionality.

Article Content

Connecting a Huijue PoE switch to a regular switch

To connect a PoE switch to a conventional switch, you will need an Injector. This small device will add PoE functionality to individual cables. But is it possible to use the POE switch as a standard switch?

BESS Equipment & Solutions | Industrial ESS, Home Battery Systems

Whether you need industrial-grade energy storage for commercial facilities, power backup solutions for telecommunication networks, or efficient home energy storage systems, Huijue delivers reliable, safe

Connect an poe switch with and non poe switch : r/homelab

I want to add an poe switch to my network. But will need to connect it to my other non poe switch. Will the non poe switch be i damaged by the current coming over the connection from the pro switch?
