

Iceland PoE Switch 800G

Overview

The S9320-32ED 800G Data Center Switch offers 8x 800GE & 24x 400GE ports, advanced AI/ML traffic control, and 16 Tbps capacity, ideal for high-performance computing. View Pricing Table 800G Ethernet is a next-generation networking standard delivering data rates of 800 Gigabits per second (Gbps). Doubling the throughput of 400G Ethernet, it provides the speed and capacity needed to support massive data exchanges in hyperscale data centers, AI training clusters, and HPC. Edgecore AIS800 is an ultra-high-density 800G OSFP High Performance Compute Data Center Switch designed for advanced data center and AI network environments that require maximum bandwidth, scalable fabric performance, and precise timing capabilities. It features 64x QSFP-DD800 ports and offers scalable, efficient network management. 800G Ethernet represents not only a doubling of bandwidth, but a comprehensive redesign of network topology, congestion control mechanisms, and physical-layer signal. 800G data center switches represent the next generation of networking technology, which includes NADDOD N9500-64OC. It is designed to meet the growing demands for higher bandwidth and faster.
