

Inexpensive optical power meters

AI Overview

For affordable optical power meters, consider options from VIAVI Solutions, Artifex Engineering, and Discount Low Voltage, which offer various models suitable for different applications.

1. VIAVI Solutions VIAVI offers a range of pocket-sized and low-cost optical power meters designed for the installation and maintenance of single-mode and multimode fiber optic networks. These meters are user-friendly and provide cost-effective solutions for both lab and production environments. Their products are ideal for quick testing and come with features that facilitate easy operation.
2. Artifex OPM150 The Artifex Optical Power Meter OPM150 is a versatile and low-cost option for precise power measurement, ranging from nW to kW. It is USB powered and controlled, making it compact and easy to use. The OPM150 supports a wide range of wavelengths and can be equipped with various adapters for specific applications. This meter is designed for lab use and OEM applications, providing a cost-effective solution without the need for a display.
3. Discount Low Voltage Discount Low Voltage offers a variety of economical optical power meters and test kits made by OWL. These devices are lightweight, portable, and designed for easy use, making them suitable for quick and efficient fiber optic testing. They feature long battery life and are constructed from durable materials, ensuring reliability in various testing environments.

These options provide a good starting point for anyone looking for low-cost optical power meters, catering to different needs and applications in the field of fiber optics.
