

Integrated Power Module Data Center

AI Overview

Integrated Power Modules (IPMs) streamline data center power delivery by combining high-density, modular, and factory-tested components to improve efficiency, scalability, and deployment speed.

Overview Integrated Power Modules (IPMs) are prefabricated, modular power distribution solutions designed to optimize data center operations. They combine medium-voltage (MV) and low-voltage (LV) switchgear, transformers, UPS systems, and control electronics into a single, factory-tested unit, reducing on-site construction complexity and accelerating time-to-power deployment (Siemens). IPMs are particularly valuable in hyperscale and AI-focused data centers where high-density power delivery and rapid scalability are critical (Infineon & Delta).

Key Benefits

- Faster Deployment:** Factory-assembled and pre-tested modules minimize on-site labor, reduce commissioning time, and enable plug-and-play installation.
- High Power Density:** Advanced designs, such as vertical power delivery (VPD) modules, allow compact, efficient power delivery directly to high-performance processors, reducing losses and heat generation.
- Energy Efficiency:** IPMs improve system efficiency through optimized power paths, reducing CO₂ emissions and operational costs.
- Scalability and Flexibility:** Modular designs allow easy expansion, relocation, or reuse across multiple sites, supporting evolving data center requirements.
- Enhanced Monitoring:** Integrated energy management and digital twin capabilities provide real-time transparency, predictive maintenance, and performance optimization.

Examples of IPM Solutions

- Siemens Prefabricated Skids:** Combines MV switchgear, transformers, and LV distribution in a compact, factory-tested module. Supports scalable deployment and reduces footprint while enabling flexible layouts.
- Infineon & Delta VPD Modules:** High-density modules for AI data centers, leveraging ultra-thin MOSFETs and embedded packaging to deliver power vertically, improving efficiency and reducing CO₂ emissions.
- Microchip MCPF1525:** S...
