

Intelligent power distribution box in Democratic Republic of Congo

AI Overview

The DRC has introduced innovative intelligent power distribution solutions such as the Kim Box and industrial multi-power cabinets to optimize electricity management for homes, businesses, and hybrid microgrids.

Kim Box: Domestic and Commercial Smart Distribution

The Kim Box, developed by Kim Engineering under engineer Prisca Makila Biakong, is a versatile intelligent electric loge designed to regulate electricity in various building types . It supports single-phase, two-phase, and three-phase systems and integrates with web and mobile applications for remote monitoring and control. Key features include:

- Real-time monitoring of voltage, temperature, humidity, and energy consumption.
- Intelligent metering capabilities to balance electrical phases and prevent equipment damage.
- Optimization of electricity usage to reduce power outages and improve reliability.
- Support for gender-inclusive innovation, highlighting local technical expertise and socio-economic development .

The Kim Box is part of the DRC's broader strategy to enhance access to reliable electricity, particularly in urban and semi-urban areas, and to encourage local entrepreneurship in energy management.

Industrial Multi-Power Distribution Cabinets

For industrial applications, companies like E-abel provide customized distribution cabinets designed for African operating conditions, including the DRC . These cabinets integrate:

- Mains, solar PV, and diesel generators with a 5-channel intelligent interlock system to ensure uninterrupted power.
- Anti-corrosion steel enclosures and optimized internal layouts for harsh climates.
- Compliance with IEC standards for low-voltage power distribution.
- Enhanced reliability and cost efficiency for factories facing unstable grid conditions.

These industrial solutions are particularly relevant for factories and commercial facilities that require continuous power supply despite frequent voltage...
