

Is it okay to move the distribution box

AI Overview

Yes, you can move your distribution box, but it must be done by a qualified electrician and may require approval from your electricity network provider.

Key Considerations

- Professional Requirement:** Relocating a consumer unit (distribution box) is not a DIY task. It involves complex electrical work, including testing, inspection, and potentially extending or rerouting existing circuits. Only a licensed, insured, and qualified electrician should perform this work to comply with safety regulations and building codes.
- Regulatory Compliance:** Moving a distribution box is considered notifiable work. Your electrician must submit an electrical wiring certificate to the regulatory body, and the work must meet wiring regulations. Any pre-existing wiring faults must be corrected before relocation.
- Technical Requirements:** Existing circuits may need to be extended or rerouted to reach the new location. Cables buried in walls may require surface-mounted junction boxes or rerouting to ensure safety. The new location must be suitable, accessible, and free from obstructions or potential damage.
- Coordination with Network Provider:** If the move involves the main supply cable or meter, your electricity network provider (e.g., ESB Networks in Ireland) must be contacted. They will provide a quote, schedule the work, and may need to install a new supply cable or service head.
- Payment** is usually required in advance, and standard moves can take 5-6 weeks once all approvals and certificates are in place.
- Cost:** The cost varies depending on the complexity of the move, cable type, and whether new joints or extensions are required. Simple moves may be relatively inexpensive, while more complex relocations can be higher due to additional materials and labor.
- Safety Precautions:** All work must ensure there is no risk of electric shock, and circuits must be fully tested before and after relocation. Any joints or extensions must be installed in protected and compliant locations.
