

KVM switcher supports 144Hz signals

Overview

KVM switches that support DisplayPort 1.1 (and beyond) typically offer the bandwidth needed for higher refresh rates and resolutions. This reduces motion blur and makes fast-moving scenes clearer, improving overall responsiveness and gameplay feel. CPU Speed A faster CPU handles game-related calculations and tasks more. Dual-support KVM switches with genuine 144Hz capability exist; this article confirms stable performance using DisplayPort 1.4 technology ensuring no lag or dropouts in dual-monitor productivity scenarios involving real-time applications. This guide explains how bandwidth, cables, and ports prevent flicker or lost HDR. A. This dual-monitor HDMI + DisplayPort KVM-Switch supports the mutual control of three desktops or docked laptops sharing two monitors and four USB 3.0 ports (including keyboard and mouse). Moreover, for peak image definitions, a model with 8K resolution at 60Hz delivers. The HDK202-M24 TESmart KVM supports HDMI 2.1, 8K@60Hz, and connects 2 PCs to 2 monitors. Ideal for designers, IT pros.
