

Kazakhstan CIF price transimpedance amplifier SFP

AI Overview

The estimated CIF price for transimpedance amplifier SFP modules in Kazakhstan is likely in the range of \$35–\$60 per unit, depending on specifications and supplier. Pricing Context Transimpedance amplifier SFP modules, such as the MAX3744/MAX3745, are used in fiber-optic communication systems and convert photodiode current to voltage for high-speed data transmission up to 2.7Gbps . These modules are typically compact, low-power, and may include features like RSSI outputs for signal monitoring. The base cost of such semiconductor devices can be inferred from Kazakhstan's average semiconductor import price, which was \$33 per unit in 2023, with fluctuations depending on supplier country and device complexity . High-performance SFP modules with integrated TIAs may command a premium above the average semiconductor price. CIF Price Estimation CIF (Cost, Insurance, and Freight) includes the product cost, shipping, and insurance to the destination port in Kazakhstan. Considering: Base semiconductor import price: ~\$33 per unit Premium for SFP module integration and TIA features: ~\$10–\$20 per unit Shipping and insurance: ~\$2–\$5 per unit (depending on quantity and logistics) This results in an estimated CIF price range of \$35–\$60 per unit. Prices may vary based on supplier, order volume, and specific SFP module specifications. Sourcing in Kazakhstan Active buyers and importers of SFP modules in Kazakhstan can be found through platforms like Tradewheel, which lists local importers seeking modules with data rates from 1.25G to higher, LC connectors, and DFB+PIN sources . For procurement, contacting these buyers or authorized distributors such as Mouser or DigiKey can provide current quotes and shipping options . Recommendations Request quotes from multiple distributors to compare CIF pricing. Specify technical requirements (data rate, wavel...
