

Maldives Cable Management Frame Model

AI Overview

The Maldives Cable Management Frame is an adjustable, slim-profile frame designed for FTTH networks, compatible with multiple splice closures and suitable for wall or pole mounting.

OverviewThe Cable Management Frame is primarily used in access points for FTTH (Fiber to the Home) networks. It is designed to accommodate both small and large splice closures, providing flexibility for various network configurations. The slim profile minimizes visibility, making it suitable for urban and residential installations.

Design and Components**Main Part:** Fastens the splice closure using an included strap and can rotate on the pole part, which is practical for winding up the cable.
Pole Part: Mounts to wooden poles using included screws and is made of composite materials for durability.
Cover and Brackets: The frame can be combined with a cover that has upper and lower brackets to form a complete management cabinet.
Compatibility: Fits several types of splice closures on the market, including models B4 and D5.

Installation Options**Wall Mounting:** Ideal for plug-and-play installations in wall boxes where a frame is required.
Pole Mounting: Provides a good distance between the frame and the mast, ensuring proper cable management and accessibility.

Applications in the MaldivesWith ongoing projects like the Dhivaru subsea cable system and local FTTH network expansions, such as those supported by Dhiraagu, cable management frames are essential for organizing fiber infrastructure at access points and connectivity hubs. They help maintain network reliability, support future expansion, and facilitate efficient installation and maintenance.

Key Benefits
Adjustable and versatile for different closure sizes
Slim and unobtrusive design
Rotatable main part for easier cable handling
Supports both wall and pole installations
Compatible with multiple closure types, enhancing flexibility in network...
