

Miller clamps for fiber optic cable stripping

Overview

Compact, three-hole design for efficient stripping. Outer Jacket Diameter: CFS-3 Series from Miller® is an innovative, industry-leading tool for today's engineers. Quickship Available: Many of our products can ship out to your local authorized distributor within 48 hours. The FO103-S Miller clamp is a precise, durable tool designed for stripping fiber optic cables, ensuring clean cuts without fiber damage, making it a preferred choice for technicians requiring reliability and consistency in field installations. Disclaimer: This content is provided by third-party. Stripping is the act of removing the protective polymer coating around optical fiber in preparation for fusion splicing, so a good quality fiber stripper will safely and efficiently remove the outside jacket from an optical fiber cable, and can help you speed up the process of performing fiber. WHAT IS INSURED AND BENEFITS: Instant protection from purchase of the item, in addition to the manufacturer's warranty/dealer warranty: 2 years worldwide protection against damage caused by dropping or falling, operating errors and defects caused by liquids for products in private use.
