

Morocco AdSS 8-core optical cable manufacturer

AI Overview

FBR Cables and FiberCorp are key providers of ADSS 8-core optical fiber cables in Morocco, offering local manufacturing, technical support, and certified quality. FBR Cables is a Moroccan manufacturer of high-performance fiber optic cables, including solutions suitable for FTTH and GPON networks. Their Bouskoura facility in Casablanca produces a wide range of fiber optic cables, including indoor, outdoor, aerial, and long-distance networks. FBR Cables emphasizes certified quality management, environmental responsibility, and occupational safety, ensuring reliable delivery and local technical support for telecom operators and integrators. They have been operating since 1999, making them a well-established local supplier. FiberCorp operates as a distributor and reseller in Morocco and West Africa for OFS Optics, a global leader in optical fiber production. They provide engineering solutions, installation kits, and training for technicians, supporting the deployment of optical fiber networks. OFS Optics has a presence in Tangier, Morocco, which allows FiberCorp to supply advanced ADSS cables locally, including 8-core configurations suitable for aerial and last-mile installations.

ADSS 8-Core Cable Overview

ADSS (All-Dielectric Self-Supporting) cables are designed to support themselves between structures without metal elements, making them ideal for installation along power lines or aerial telecom routes. An 8-core ADSS cable is commonly used for last-mile connections, connecting end users to FTTH or GPON networks. These cables are mechanically strong, weather-resistant, and suitable for both indoor and outdoor applications. Testing and quality verification are typically performed using OTDR (Optical Time Domain Reflectometer) to ensure signal integrity.
