

Mpo jumper wire 100g

Overview

0mm 100G MPO to MPO Jumper Patch Cord with Female Connector (10m length) is designed for high-speed network applications in data centers. It provides an ideal solution for 40/100G high-density environments with 12-fiber MTP/MPO cabling. The MTP® jumpers allow for the seamless migration to higher data rates for multimode systems in the data center when used in conjunction with our trunks. Unlike traditional duplex patch cords, MPO jumpers support multiple fibers in a single connector. This article introduces their basis first, then breaks down MTP®/MPO cable types by cable structure, fiber polarity, fiber count, cable mode, and jacket rating, providing a clear roadmap for different network deployments. What Are MTP®/MPO Cables?

An MTP®/MPO cable is a high-density fiber optic. ✓ OS2 single mode fiber optimized for high-speed 40G/100G Ethernet applications ✓ MPO UPC female to MPO UPC female connectors with Type B polarity ✓ Multiple polarity options ensure correct fiber alignment for parallel optical transmission ✓ Yellow LSZH jacket for easy identification and enhanced. MTP/MPO optical cable jumper is used for 40g/100g/200g/400g data center wiring. Each unit is packed in an OPP bag.
