

Myanmar Fiber Optic Communication

AI Overview

The Myanmar Fiber Optic Communication Network, primarily represented by Myanmar Fiber Optic Communication Network Co., Ltd (MFOCN), plays a crucial role in enhancing telecommunications infrastructure in Myanmar through extensive fiber optic projects.

Overview of MFOCN Myanmar Fiber Optic Communication Network Co., Ltd (MFOCN) is a foreign-invested subsidiary of HyalRoute Communication Group Limited, established on May 22, 2012. MFOCN focuses on investing, implementing, operating, and maintaining fiber optic networks and related infrastructure services. The company operates under the concept of infrastructure sharing, providing services to telecom operators, internet service providers (ISPs), and corporate clients.

Infrastructure and Services MFOCN's infrastructure includes a comprehensive fiber optic network that consists of backbone networks, metro duct networks, and access networks. This infrastructure allows clients to rapidly deploy their networks and commence operations efficiently. MFOCN also offers services such as leasing and selling fiber optic products, which are essential for the growth of telecommunications in Myanmar.

Key Projects One of the significant projects undertaken by MFOCN is the Second HyalRoute Fiber Optic Cable Network Project, which involves the construction of an additional 4,000 km of fiber optic cable. This project is expected to improve telecommunications infrastructure significantly and promote economic growth in Myanmar. The first project, which constructed 4,500 km of fiber optic cable, was completed in October 2017. The total investment for the second project is estimated at \$114.76 million, supported by guarantees from the Multilateral Investment Guarantee Agency (MIGA).

Impact on Telecommunications The development of the fiber optic network is aligned with the Government of Myanmar's Telecom Master Plan (2016-2020), which aims to enhance fiber optic cable network development and attract foreign direct investment in the telecom sector. The expansion of fiber optic...
