

Network overhead cable tray

Overview

Cable tray systems are the perfect solution for running large quantities of power or data cables overhead or under-floor. Also known as baskets, trunking, or cable ladders, these systems are designed to both route and provide support for vital wiring. It provides speed of deployment, structural integrity, cable protection and ease of use to drive business results. They can easily be moved, reconfigured, or expanded as needed to meet changing requirements and evolving connectivity needs. From heavy power cable pathways on oil drilling platforms to data center cabling, explore the cable tray that's strong yet. Tripp Lite's wire mesh Cable Tray System accommodates copper network cables, A/V cables and lightweight cables/cable bundles to reduce cable clutter in data centers, server rooms and other IT environments.
