

**Frequency: 144 MHz / 430 MHz**  
**Band width: 3 MHz / 10 MHz**  
**Gain: 6.0 dBi / 8.0dBi**  
**Length: 250cm**

The diagram illustrates a repeater system. A yellow lightning bolt represents the signal path from a mobile phone to a repeater antenna mounted on a tower. The tower also has a receiving antenna. Below the tower, a building is labeled 'Repeater'. To the right, a spectrum analyzer display shows a signal trace with a peak at 144 MHz. The display includes a grid and various frequency markers.

The Vertiv EPC48 and Huawei Power-M are leading outdoor integrated power supply systems, offering high reliability, modularity, and remote monitoring for automated power distribution.

**Vertiv EPC48 Outdoor Power System**

The EPC48 is an integrated outdoor power supply solution designed for centralized base station power management. It combines a power supply system, temperature control, environment monitoring, and battery backup, providing high reliability, efficiency, and flexibility for outdoor installations . Key features include:

- Multi-capacity power supply:** High-frequency switching system with capacities up to 300A.
- Intelligent temperature control:** Heat exchangers, air conditioners, and heaters configurable for site conditions.
- High protection class:** IP55-rated cabinet suitable for long-term outdoor use, with rainwater and snow-resistant design.
- Remote monitoring:** Supports RS232/485 and TCP/IP interfaces for system alarms and remote management.
- Ease of installation and maintenance:** Modular design with extended base and level cabinet cap. This system is widely used in telecom and industrial applications where automated power distribution and environmental resilience are critical.

**Huawei Power-M**

The Huawei Power-M is an intelligent integrated power supply system suitable for indoor and outdoor installations. It features a power module with inverter, high-capacity lithium-iron phosphate battery, and compatibility with off-grid PV solar or on-grid mains power . Highlights include:

- Hybrid operation:** Automatically switches between PV, battery, and mains power.
- Pure sine wave output:** Safe for sensitive electronics.
- Scalable battery capacity:** Up to 30 kWh through multiple unit connectio...
