

Outdoor stranded single-mode optical fiber

Overview

This fiber is designed for harsh environments that are subject to wide temperature variations. The loose tube gel-free design is fully waterblocked using craft-friendly, water-swallowable materials, which means cable access is simple and no clean. This is an Outdoor gel-filled cable which provides extra protection against water penetration. Its dry absorbent polymers eliminate water migration in cable interstices. It has a rugged UV resistant. Fiber optic cables for outdoor applications are engineered to withstand the more demanding conditions seen outside, from environmental extremes to mechanical forces. These are the outdoor fiber optic cables you see strung along telephone poles (aerial), installed inside an underground duct, or even. This 6-Strand Hybrid Fiber Optic Cable features single-mode 9/125 fibers and two 14 AWG stranded copper conductors, making it ideal for both data and power transmission. ALTOS Loose Tube, Gel-free, All-dielectric Cable With Fastaccess (tm) Technology, 12 Fiber, Single-mode (OS2), Max.
