

Price list for single-mode four-core fiber optic cables

AI Overview

A single-mode 4-core fiber optic cable typically costs between \$0.10 and \$3.50 per foot, depending on construction, jacket type, and additional features. Price Range The cost of a 4-core single-mode fiber optic cable varies based on several factors: Basic cable materials: For standard indoor or duct installations, prices generally range from \$0.10 to \$0.50 per foot for the cable itself, reflecting the single-mode design and moderate fiber count. Bulk or wholesale purchases: Buying in larger quantities can reduce the per-foot cost to \$0.09 to \$1.52 per foot. Retail or pre-terminated cables: Pre-terminated assemblies, armored cables, or cables with specialized jackets (UV-resistant, outdoor-rated) can cost \$2.00 to \$7.00 per foot. Armored or outdoor versions: Cables designed for direct burial, rodent resistance, or aerial deployment may include steel or aluminum armor, increasing costs due to added materials and manufacturing complexity. Factors Affecting Cost Cable Construction: Tight-buffered vs loose-tube, armored vs non-armored, and indoor vs outdoor ratings significantly influence price. Jacket Material: PVC, LSZH, or PE jackets for environmental protection affect durability and cost. Application: Indoor duct runs are cheaper than outdoor or direct-burial installations due to lower material and compliance requirements. Quality and Standards: Cables meeting ITU-T G.652.D standards or other certifications may cost more but offer better performance and longevity. Summary For a single-mode 4-core fiber optic cable, expect a base material cost of \$0.10–\$0.50 per foot for standard indoor use, with prices rising to \$2–\$3.50 per foot for armored, outdoor, or pre-terminated versions. Bulk purchases and simpler indoor applications can reduce costs, while specialized features and environmental protections increase the total price.
