

Price list for temporary building electrical distribution boxes

AI Overview

Temporary building electrical distribution boxes typically range from \$150 to \$1,200 depending on capacity, features, and brand. Overview Temporary power distribution boxes, also known as site boxes or spider boxes, are used on construction sites, outdoor events, or temporary installations to safely distribute electricity before permanent panels are installed. They usually include circuit breakers, differential switches, multiple outlets, and emergency stop buttons to ensure safety and prevent overloads. Many are weatherproof and dustproof, suitable for harsh environments.

Price Range Basic residential or small site boxes: \$150–\$300. These typically provide a few standard outlets and lower amperage (20–50A) suitable for light tools or temporary lighting. Mid-range commercial boxes: \$300–\$700. These include higher amperage (50–100A), multiple circuits, and enhanced safety features for medium-sized construction sites or events. Heavy-duty industrial boxes: \$700–\$1,200+.

Designed for large construction sites or industrial applications, these units support three-phase power, multiple high-capacity outlets, and advanced monitoring or remote control features.

Factors Affecting Cost Amperage and voltage rating – Higher capacity boxes cost more. Number of circuits and outlets – More outlets and circuits increase price. Material and durability – Weatherproof, dustproof, and rugged enclosures are more expensive. Brand and certifications – Reputable brands like Schneider, Western, or Grainger may carry premium pricing. Additional features – Smart monitoring, remote control, or custom mounting options can raise costs.

Where to Buy Online retailers: Amazon offers portable temporary power boxes starting around \$150–\$400. Specialized suppliers: One-Elec stocks Schneider Kaedra site boxes with fast delivery and technical support. Industrial distributors: Grainger...
