

Price of 36-core ASS optical cable

AI Overview

The price of a 36-core ASS optical cable typically ranges from \$1 to \$5 per meter, depending on type, quality, and supplier. Price Overview The cost of a 36-core optical cable varies based on several factors, including whether it is single-mode or multi-mode, armored or non-armored, and indoor or outdoor rated. For example, single-mode non-metallic fiber optic cables from Chinese manufacturers are generally priced at \$1–\$3 per meter for standard quality, while armored outdoor variants with steel or aramid reinforcement can cost \$3–\$5 per meter due to added durability and protection against environmental factors. Bulk orders often reduce the per-meter cost.

Factors Affecting Price

Cable Type: Single-mode cables are usually more expensive than multi-mode due to higher performance for long-distance transmission.

Armoring and Jacket Material: Armored cables with polyethylene jackets or corrugated steel armor are more costly but suitable for outdoor or industrial use.

Certifications and Quality: ISO, CE, RoHS, and UL-certified cables may carry a premium price but ensure reliability and compliance.

Supplier and Location: Prices vary between manufacturers and regions. Chinese suppliers often offer competitive pricing for bulk shipments.

Purchasing Tips

Request Quotes: Contact multiple suppliers to compare prices and shipping costs.

Check Specifications: Ensure the cable meets your network requirements, including fiber type, core count, and environmental rating.

Consider Warranty and Support: Many suppliers offer 2-year warranties and technical support, which can be valuable for long-term installations.

For precise pricing, it is recommended to request a quote from verified suppliers such as those listed on Alibaba, Made-in-China, or GoldSupplier, specifying the cable type, length, and any additional features required.
