

Exact pricing for Anti-Calling CS Connectors in El Salvador is not publicly listed, but typical high-power CS connectors range from \$50 to \$500+ depending on current rating and configuration.

Overview Anti-Calling CS Connectors are high-power connectors designed for industrial and energy applications, supporting currents from 15 A up to 1250 A with low contact resistance and high reliability, as offered by manufacturers like Amphenol CS . These connectors are suitable for applications in power distribution, industrial automation, and energy management systems.

Compatibility with El Salvador El Salvador uses Type A and B outlets with a standard voltage of 115-120 V and a frequency of 60 Hz . While Anti-Calling CS Connectors are typically used in high-current or specialized power systems, they are compatible with local infrastructure if integrated into custom power distribution panels or industrial setups. Standard household outlets are not directly compatible with these connectors.

Pricing Considerations

Current rating and configuration: Connectors with higher amperage or multiple positions cost more. For example, a 60 A AC input connector may cost around \$50-\$100, while high-current 600-1250 A connectors can exceed \$400-\$500 per unit .

Plating and material: Silver-plated or proprietary GCS®/AGT® connectors are more expensive due to enhanced conductivity and durability.

Quantity and supplier: Bulk orders or direct purchase from distributors may reduce per-unit cost. Shipping to El Salvador may add additional fees.

How to Source

Contact authorized distributors: Amphenol CS and other industrial suppliers provide quotes for specific connector models.

Specify requirements: Include current rating, number of positions, and environmental conditions.

Request shipping to El Salvador: Confirm import regulations and shipping costs.

Consider local industri...
