

Price of Custom-Made Mesh Cable Trays in Belgium

AI Overview

Custom-made mesh cable trays in Belgium typically require a project-specific quote, with prices influenced by material, size, and installation complexity.

Overview of Pricing Factors

The cost of mesh cable trays depends on several key factors:

- Material and Finish:** Steel wire mesh trays are the most common, with options for galvanized, stainless steel, or powder-coated finishes. Stainless steel and coated trays are more expensive due to corrosion resistance and durability.
- Customization:** Custom sizes, shapes, and configurations increase the price. Trays that need bends, corners, or special supports require additional labor and material.
- Installation Requirements:** On-site cutting, assembly, and protective covers for outdoor use can significantly affect the total cost.
- Supplier and Local Manufacturing:** Belgian manufacturers like Trayco specialize in 100% locally produced trays, which may reduce shipping costs and allow for tailored solutions. Jeetmull Jaichandlall also offers high-quality, customizable trays with attention to industry standards. Cablofil provides online configurators to estimate project costs based on 3D modeling.

Typical Cost Range

While exact prices vary, wire mesh or basket-style cable trays are generally the most affordable option compared to solid metal conduits. In general:

- Small, standard trays for office or data center use may start around €20–€50 per meter for basic steel mesh.
- Larger, heavy-duty, or fully customized trays can range from €50–€150 per meter, depending on material, load capacity, and complexity.
- Additional costs for covers, outdoor protection, or specialized supports can nearly double the price in some cases.

How to Obtain Accurate Pricing

Request a Quote: Contact suppliers like Trayco, Jeetmull Jaichandlall, or Cablofil with your project specifications. Provide dimensions, load requirements, and any special features.

Use Online Configurators: Cablofil offers a w...
